State-of-the-Art Energy Related Technologies in Canada 2020–2021

Message from the Guest Editors

This Special Issue aims to provide an insightful overview of the State-of-the-Art Energy-Related Technologies in Canada 2020–2021. Authors from universities, industry, or research institutions are welcome to share their relevant contributions in the form of research articles for this Special Issue. The potential topics include, but are not limited to, the following:

- Power systems;
- Smart grids;
- Renewable energy;
- Sustainable energy;
- High-voltage insulation systems;
- High-voltage testing;
- Energy efficiency;
- Power measurement;
- Power quality and harmonics.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.
