State-of-the-Art Energy Related Technologies and New Business Models in UK

Message from the Guest Editor

This Special Issue will provide a comprehensive overview of state-of-the-art energy-related technologies and related business models in the UK. Research articles are invited, which will provide a consolidated, up-to-date perspective in energy-related areas. The Special Issue will publish full research papers and reviews. Potential topics include but are not limited to the topics below:

- Artificial Intelligence
- Machine Learning
- Deep Learning
- Blockchain
- Internet of Things
- 5G
- Energy demand
- GHG emissions
- Energy policy
- Regulations
- Business model
- Electricity markets
- Sustainable Development Goals

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.
