

## Special Issue

# Advanced Protection and Control Techniques of Smart Grids and Distributed Power Generation Systems Based on Renewable Energy

### Message from the Guest Editors

The scope of this Special Issue is to provide a significant contribution beyond the current state-of-the-art with respect to the complex issue of smart grids control and protection, with emphasis on distributed power generation systems. The solutions area ranges from power systems protection and control, HVDC, FACTS and power electronics, to smart grids, load forecasting, and energy storage. This Special Issue particularly welcomes papers that address the power system from an interdisciplinary point of view, which goes beyond the traditional approaches and analysis of single issues, and addresses instead the electrical power system in a holistic manner.

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
