

## Special Issue

# Solar Energy, Governance and CO<sub>2</sub> Emissions

### Message from the Guest Editors

To explore and highlight the latest advancements in this crucial area, the *Energies* journal is launching a Special Issue titled "Solar Energy, Governance and CO<sub>2</sub> Emissions". This Issue aims to showcase pioneering research and insights into solar energy and electric mobility solutions driven by effective governance to reduce CO<sub>2</sub> emissions. We invite contributions that address a wide range of topics, including, but not limited to, innovations in solar technology, the integration of solar energy with electric mobility solutions, the impact of climate change on future solar energy production and electric mobility, and the role of governance in facilitating CO<sub>2</sub> emission reductions. Potential submissions might explore novel solar energy systems, advancements in energy storage and grid integration, electric vehicles and their charging infrastructure powered by solar energy, life cycle assessment and environmental impact evaluation of solar energy and electric mobility technologies, and the societal and economic impacts of solar energy and electric mobility policies.

### Guest Editors

Dr. Arnold Johan Rix

Department of Electrical and Electronic Engineering, Stellenbosch University, Private Bag X1, Matieland 7602, South Africa

Prof. Dr. Alan Brent

Sustainable Energy Systems, School of Engineering and Computer Science, Victoria University of Wellington, 6140 Wellington, New Zealand

### Deadline for manuscript submissions

25 August 2025

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

### Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University  
Niccolò Cusano, 00166 Roma, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
