

## Special Issue

# Social Acceptability of Alternative Energy Technology

### Message from the Guest Editors

The Special Issue “Social Acceptability of Alternative Energy Technology” will focus attention on the link between science, technology, politics, and society. As Manzella, et al. (2019: v) note, “The public has become a major actor in the techno-scientific debate.” We invite papers that reflect upon this new reality that shapes energy policy today and will likely continue to do well into the future. We invite papers that employ quantitative, qualitative, or mixed method analysis in both theory testing and development. Comparative methods are highly valued as well.

---

### Guest Editors

Prof. Dr. Brent S. Steel

School of Public Policy, Oregon State University, Corvallis, OR 97331, USA

Prof. Dr. Christopher A. Simon

Department of Political Science, University of Utah, Salt Lake City, UT 84112-9155, USA

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

---

### Editor-in-Chief

Prof. Dr. Enrico Sciubba  
Department of Mechanical and Industrial Engineering, University  
Niccolò Cusano, 00166 Roma, Italy

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
