

Topical Collection

Featured Papers in Solar Energy and Photovoltaic Systems Section

Message from the Collection Editors

This Topical Collection aims to collect original papers and reviews reporting the latest advances in the broad field of solar and photovoltaic systems, including power generation and storage. We will focus on both established technologies applied in the real-world and prototype systems demonstrated on a laboratory scale. The demonstration of new material concepts and their application in devices is of particular relevance as a method of providing the community with new potential solutions for future applications.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
