

Topical Collection

Review Papers in Solar Energy and Photovoltaic Systems

Message from the Collection Editors

In recent decades, researchers have proposed and developed different technologies to satisfy the world's growing demand for energy. These energy developments have included conventional fossil fuels and renewable energy. With the current energy policies, the need for clean energies has increased dramatically to mitigate environmental impacts. For research, it is critical to access papers that logically present information about the evolution of energy trends and technologies. This Topical Collection will focus on high-quality review papers with clear information and engaging discussions about the latest trends in energy topics and their environmental impacts. This Topical Collection will cover review papers in the area of energy engineering, electrical energy systems, thermodynamics, energy sources, energy storage and application, energy economics and policy and renewable energy.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
