

## Special Issue

# Solar Thermoelectric Generators

### Message from the Guest Editors

STEGs are thermoelectric generators that use solar radiation as a heat source. STEGs are very simple, reliable, and lightweight, and they may operate with high-temperature high-efficiency thermoelectric modules. All of these features, among others, have recently increased the interest of using STEGs to provide electrical energy in off-grid applications, to improve the energy efficiency of systems and facilities, and so on. This Special Issue focuses on the analysis, design, and implementation of STEGs. Potential topics include, but are not limited to, the following:

- STEG design (cold and/or hot heat sinks, structure design of thermoelectric modules, etc.)
- Performance analysis of STEG systems
- Optimization studies of STEG systems
- High-performance thermoelectric materials for STEG applications
- Non-conventional applications of STEG (windows, façades, roads, etc.)
- Micro-power STEG systems
- STEG for space applications
- STEG integrated in other energy systems
- Hybrid PV-STEG systems

### Guest Editors

Dr. Toni Pujol

Dept Mech Engr & Ind Construct, Univ Girona, 17003 Girona, Spain

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

---

### Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University  
Niccolò Cusano, 00166 Roma, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
