

Special Issue

Sustainable Development, Energy Economics and Economic Analysis

Message from the Guest Editors

Challenges related to the topic of sustainable development have been analyzed for many years. Nowadays, we are increasingly aware of the fact that without taking decisive steps towards sustainable production, distribution and consumption, we will not be able to achieve the aims set out in The 2030 Agenda for Sustainable Development Goals (SDGs). The main aim of this Special Issue is to highlight the efforts of researchers from all over the world in theory and practice of sustainable development relevant with economic analysis, especially in the field of broadly defined energy economics. This challenges are related to economic, financial, social, environmental and technological factors and tools. Issues can be based on a supranational, national, regional or local level. We are open to analyses showing the studied phenomena broken down into rural areas and cities. In this context, theoretical and practical studies of economic problems related to the sustainable development, economics and energy are required. We welcome original papers which provides new insights into this topics. We hope you will be a part of this journey.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
