

Special Issue

Eco-Efficiency of the Transition from Coal Mining to Green Energy

Message from the Guest Editors

This Special Issue is devoted to the current challenges and the latest developments in widely understood eco-efficient transition from traditional coal mining industry to the industry based on green energy. Papers dealing with engineering, process integration, eco-efficiency, and environmental issues related to the transformations aiming at repurposing of carbon intensive coal-fired power plants into less polluting gas-fired or biomass-fired power plants, in particular papers addressing the question to what extent the replacement of coal with natural gas and/or biomass is environmentally sound. The papers devoted to the green electricity generation in systems based on PV and wind power, as well as utilization of surplus green electricity in water electrolysis to provide hydrogen for carbon dioxide conversion into value-added products (Power-to-X technologies); thermochemical conversion of biomass/biowaste/sewage sludge, as well as methane pyrolysis into hydrogen and carbon. Additionally, the papers focused on repurposing of end-of-life coal mines by deploying emerging renewable energy and circular economy technologies to promote transition to green energy are encouraged.

Guest Editors

Prof. Dr. Józef Dubiński

Prof. Dr. Adam Smoliński

Prof. Dr. Natalia Howaniec

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
