

## Special Issue

# Technological Change in Renewable Energy Systems

### Message from the Guest Editors

The purpose of this Special Issue is to publish the best insights from systems-level research on invention, innovation, and technological change around renewable energy, carbon sequestration, and climate adaptation and mitigation. We will evaluate this research with some consideration to public policy and actionable solutions for policymakers and practitioners. Given the systems-level focus and the eye to policy incentives and solutions we anticipate this issue will experience exceptionally high readership and citations as it serves a particularly large audience. There are no specific restrictions on the topics for this Special Issue, but we encourage submissions of the highest merit from authors. The breadth and originality of the research will be the primary consideration for publication. Prof. Dr. Debbie Strumsky

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
