

Special Issue

Advanced Thermal Energy Storage Technologies

Message from the Guest Editor

I was invited to act as of this Special Issue about thermal energy storage in energy systems. The Issue is focused on both component characterization and system integration of TES. Analytical, numerical, and experimental methodologies—mainly for medium- and high-temperature storage—can be proposed. Novel storage technologies, sizing, renewable energy integration, storage materials, heat transfer enhancement in storage devices, and cost/performance optimization are the main topics of the Issue.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
