

Special Issue

New Insights into Transport Economics and Renewable Energy Sources

Message from the Guest Editors

This special issue is aimed at collecting scientific articles and reviews related to the study of impact of transport on the environment in the energy sector. Topics of interest for publication include, but are not limited to:

- Decarbonization of road transport
- Impact of transport on the environmental sphere in the energy sector
- Minimalization of the greenhouse gas emissions as a factual challenge
- Quo vadis? Sustainable transport is possible after pandemic COVID-19?
- Future transport in the context of use renewable energy sources
- Scenarios of energy efficiency of transport
- The role of energy shocks in supply chain
- What will be next? How implement transport policy without any negative effects?

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba
Department of Mechanical and Industrial Engineering, University
