

Special Issue

Trends and Innovations in Wind Power Systems

Message from the Guest Editors

This Special Issue will gather new research results and future trends in the field of wind turbines, covering a broad range of topics of interest for publication but not limited to the following:

- Wind energy potential and forecasting
- Innovative design and optimization of wind turbines
- Modeling and numerical simulation of wind turbines
- Intelligent control of wind turbines
- Wind energy conversion efficiency
- Reliability and maintenance of wind turbines
- Integration of wind turbines in the built environment
- Energy management

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief
