

## Special Issue

# Recent Advances in Hybrid Renewable Energy System

### Message from the Guest Editor

In this Special Issue, recent advances in hybrid renewable energies will be covered with special attention to novel multigeneration systems, new energy hub management approaches, and creative multi-carrier and multi-product networks. All design, optimization, control, and monitoring of the systems can be covered in the articles. Colleagues are encouraged to discuss the resiliency and reliability in renewable energies hybridization. The applications of hybrid renewable energy systems in all buildings, industries, and sectors can be investigated. Authors can submit their research outputs as full-length research articles or letters. State-of-the-art literature can be explored in critical in-depth review manuscripts to highlight the future research on the topic. We are especially interested in the significance of employing various energy sources in dynamic social, economic, and ecological conditions. The less-seen aspects of hybrid renewable energies research can be highlighted by implementing cutting-edge artificial intelligence and smart materials.

### Guest Editor

Dr. Pouya Ifaei

Department of Environmental Science and Engineering, College of Engineering, Center for Environmental Studies, Kyung Hee University, Seocheon-dong 1, Giheung-gu, Yongin-Si 446-701, Gyeonggi-Do, Republic of Korea

### Deadline for manuscript submissions

closed (31 March 2024)

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

### Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University  
Niccolò Cusano, 00166 Roma, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
