

Special Issue

Managing Energy Sector Enterprises: Challenges, Methods and Research Trends: 2nd Edition

Message from the Guest Editors

This Special Issue calls for both conceptual and practical research papers in management sciences from the perspective of energy sector companies. Issues related to strategic management, organizational restructuring, marketing, innovations management, and finance management are of importance today to every organization operating in the energy sector. How can we then select the appropriate methods for problem solving in energy firms? How can we deal with stakeholders on the company, contractors, customer, and government level? What are the current challenges and research trends in managing energy sector enterprises? What business models are utilized by this type of firms? These are some of the questions that are raised by this Special Issue. Moreover, good theory needs robust and appropriate research methods tailored to the investigated scientific problem. These are some, but not all of the theoretical and methodological issues being covered in this Special Issue. High-quality papers based on robust research methodology are warmly welcome to this issue.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
