

Special Issue

Unconventional Oil and Gas Well Monitoring and Development

Message from the Guest Editors

This Special Issue aims to present the latest findings and developments of reservoir description, monitoring, interpretation, and simulation in unconventional oil and gas resources. Topics of interest for publication include, but are not limited to:

- Micro/nano pore characterization and evaluation;
- Oil and gas flow mechanism;
- Drilling, completion, hydraulic fracturing, and related reservoir damage and stimulation;
- Fracture characterization and simulation;
- Well testing analysis;
- Production data analysis;
- Big data in oil and gas development;
- Heavy oil and oil sand thermal recovery;
- Heavy oil enhanced oil recovery;
- Reservoir monitor and evaluation by electrical resistance tomography (ERT);
- Natural gas hydrates flow behaviour used electrical tomography

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba
Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
