

## Special Issue

# Control and Management of Electric Power System in Vehicles

### Message from the Guest Editors

As is well known, key technologies in EVs include motor drive technology, power electronic technology, micro-electronic and control technology, automotive technology, material technology, and energy storage technology. Integration of all these techniques is the key to success in EVs. The most important issues in EV design are System Integration (SI) and Optimization. Moreover, high-performing electric machines are coupled with a high-performing control algorithm to deliver maximum system efficiency and performance. The objective of this Special Issue is to bring together state-of-the-art research contributions that explore the technology solutions, models, control and management methods, approaches, and technological innovations to obtain more efficient performance and comfort with safety and reliable operations at a cheaper price. Special attention to the most recent experimental applications, in particular, highly efficient solutions over a wide range of driving conditions, considering V2G, V1G and V2H operating conditions, are greatly desirable.

### Guest Editors

Dr. Anna Pinnarelli

Prof. Dr. Daniele Menniti

Dr. Giuseppe Barone

Dr. Pasquale Vizza

### Deadline for manuscript submissions

closed (10 May 2022)

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

---

### Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University  
Niccolò Cusano, 00166 Roma, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
