

Special Issue

Vehicle and Traffic Safety

Message from the Guest Editors

The role of the road transport of people and goods is increasing. Despite significant progress in the development of car design and road safety improvement programs, the number of accidents and their casualties, as well as the related economic and social costs, remains unsatisfactory. In this context, it is extremely important to develop and exchange knowledge on contemporary car safety problems, interactions in the vehicle–human–road system, the development of car construction, and methods of analyzing road accidents. We invite researchers, specialists, and industry representatives to publish their achievements on various topics in the areas of transport and automotive engineering: active and passive vehicle safety, vehicle dynamics and stability, accident analysis and reconstruction; and the impact on road safety of aspects such as traffic control systems, road infrastructure (including street and road lighting), vehicle autonomy, and human factors. We are convinced that the collection of high-quality articles on the above-mentioned topics in this Special Issue of the journal will bring a great deal of valuable experience to everyone.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
