

Special Issue

Power Electronics Technology and Motor Drive Control

Message from the Guest Editor

The core of modern energy conversion and motion control cannot be separated from power electronics and motor drive control. These technologies not only continue to drive the upgrading of traditional areas such as industrial automation and household appliances but also play a crucial role in emerging areas such as new energy vehicles, renewable energy generation, robotics, intelligent manufacturing, aerospace propulsion and high-end servo systems. This Special Issue aims to bring together and present the latest research progress and breakthroughs in the fields of power electronics and motor drive control in terms of basic theory, innovative design, modeling and analysis, practical applications, advanced control strategies and system health management. We invite scholars and engineers in related fields to share original research papers and jointly promote the cutting-edge development of this interdisciplinary field.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
