

Special Issue

Energy Economics and Policy Analysis

Message from the Guest Editor

This Special Issue is calling for high-quality research papers covering a wide range of topics related to: energy economics, energy finance, energy policy, or sustainable energy development. Articles should provide an overview of the economic and political forces that shape the global energy industry. Moreover, papers covering policies promoting the usage of renewable energy to attain sustainable economic growth with objectives related to environmental issues are welcome. Topics of interest for publication include, but are not limited to:

- Cost of renewable resources;
- Carbon/electricity markets;
- Analysis and forecasting of electric power/natural gas/coal/fuels/petroleum products;
- Energy policy making (bioenergy, the climate, etc.);
- Energy law and regulation;
- Economic growth and sustainable energy production (electricity/coal/household, etc.);
- Pro-ecological business models.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
