

## Special Issue

# WP3 – Innovation in Agriculture and Forestry Sector for Energetic Sustainability

### Message from the Guest Editors

This Special Issue was founded after the creation of a department of excellence at the University of Tuscia (Viterbo, Italy). In particular, in the context of the WP3 objective, there is a need of innovation in the agricultural and forestry sectors for energy sustainability.

Renewable energy sources and the rational use of energy represent an important agricultural and forestry resource in a local context against climate change. The first issue that this Special Issue will address is identifying the energy potential from agro-forestry biomass, also dealing with the production of agricultural and forestry biomass in terms of supply and logistics.

The second issue focuses on the performance analysis of prototypal systems for energy conversion, including hydrogen, power and/or heat production plants and the pertinent thermodynamic cycles. The third issue focuses on energy sustainability for environmental mitigation such as the impact of large-scale/small-scale bioenergy systems.

---

### Guest Editors

Dr. Andrea Colantoni

Prof. Dr. Massimo Cecchini

Prof. Dr. Alvaro Marucci

Dr. Fabio Recanatesi

Dr. Elena Di Mattia

Prof. Dr. Rodolfo Picchio

et al.

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
