

## Special Issue

# Wind and Marine Energy Technologies and Their Applications

### Message from the Guest Editor

With the success of the offshore wind industry and the rapid development in, and expectations for, floating wind turbines alongside continued progress in wave and tidal technology, this Special Issue on wind and marine energy technologies and applications aims to bring together contributions to the latest research on technological developments for wind, wave, and tidal energy extraction together with research on methods to exploit these developments for sustainable development. This includes analysis and discussion of routes to implementation of these developing and emerging technologies. Contribution on a single technology, from resource assessment analysis methods to structural or fluid-dynamics analysis methods are welcome, as are contributions on cross-fertilisation between wind, wave, and tidal technologies or the benefits of hybrid systems by, for example, combining wind and wave, or combining one of the technologies with energy storage or hydrogen production. Contributions are also welcome on the integration of offshore energy into the electricity or energy system as well as on environmental impacts from installations.

### Guest Editor

Dr. Wolf-Gerrit Früh

Heriot-Watt University, School of Engineering & Physical Sciences,  
Edinburgh EH14 4AS, UK

### Deadline for manuscript submissions

closed (15 October 2020)

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

---

### Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University  
Niccolò Cusano, 00166 Roma, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
