

## Special Issue

# Advanced Control and Coordinated Optimization of Distributed Power Systems

### Message from the Guest Editors

This Special Issue aims to present and disseminate the most recent advances related to the control, stability analysis, and coordinated optimization of DERs. The topics of interest include, but are not limited to, the following research areas: (1) Adaptive and robust control of DER power converters. (2) Advanced stabilization control of high-penetration power converters. (3) Enhanced power quality control in distributed power systems. (4) Advanced grid-forming control methods for use in power converters for DERs.

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
