

Special Issue

Renewable Energy and Nearly-Zero Emissions Energy Systems

Message from the Guest Editors

The Special Issue aims to provide a comprehensive overview of the latest research developments, emerging trends, and future directions in renewable energy and nearly-zero emissions systems. It encourages contributions that reflect a holistic approach to energy system design, incorporating interdisciplinary perspectives and innovative solutions tailored to the unique needs of various sectors. This Special Issue welcomes submissions that address the complexities and opportunities associated with transitioning to nearly-zero emissions energy systems, offering valuable insights for researchers, industry professionals, and policymakers engaged in advancing the global energy transformation agenda and frameworks.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
