

Special Issue

Advanced Technologies for Electrified Transportation

Message from the Guest Editors

This [Special Issue](#) will focus on the advanced technologies for electrified transportation. In particular, there are four competitive advances in recent years: (1) high torque density of machines and magnetic differentials for electric launch; (2) high energy density and accurate health diagnostics of energy storage systems for durable cruise; (3) high convenience and high efficiency of energy refueling and regenerating technologies during operation; and (4) high reliability of advanced control for battery charging, motor drives, and power electronics. In this context, prospective authors are invited to submit their original contributions, surveys, or tutorial papers in the above areas.

Guest Editors

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
