

## Special Issue

# Advances in Urban Power Distribution System

### Message from the Guest Editors

This Special Issue aims to draw attention to research and review articles on the existing urban power distribution systems. The focus will be on promoting theoretical and practical studies in the control and operation of the urban power distribution system to help the application of advancing technologies and their related theory in the urban power distribution systems. The topics of interest include but are not limited to the following: 1) Flexible operation of hybrid AC/DC urban power distribution systems. 2) Intelligent control for the reliable operation of inflexible urban power distribution systems. 3) Theory and method of a coordinated operation in urban power distribution systems with high proportional renewable energies, flexible loads, and energy storage. 4) Measurement and data-driven approaches to improve the operation quality of urban power distribution systems. 5) The application of medium- and low-voltage level DC technology in urban power distribution systems. 6) Coordination of renewable energies operation in urban power distribution systems.

---

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
