

Special Issue

Artificial Intelligence on Energy 4.0

Message from the Guest Editors

This Special Issue considers the digitalization of the energy and utilities sector towards Energy 4.0, and how these transformations, supported by artificial intelligence technology, will impact the factories of the future. Papers considering the following areas of research are invited:

- Cyberphysical systems applied to energy sector;
- Optimization and control of power generation plants;
- Artificial intelligence-based demand response;
- Predictive maintenance and machine learning applied to the energy and utilities sector;
- Industrial Internet of Things in energy management;
- Industrial smart grids: transportation, distribution and energy storage.

Guest Editors

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba
Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
