Special Issue

Advances in Alternative Fuels for Internal Combustion Engine and Environmental Pollution

Message from the Guest Editor

The combination of the diminishing supply of conventional energy reserves and the significant environmental issues and global warming have made Advance Alternative Fuels a very important topic of research and attractive source for the future. This Special Issue would address the current and future issues of Advance Alternative Fuel. We are delighted to invite researchers in the area of Energy, Emission and specifically alternative fuels to submit their contribution to our Special Issue of Advances in Alternative Fuels for Internal Combustion Engine and Environmental Pollution We are interested in articles related to renewable energy resources, biofuel from difference sources such as biomass production, Hydrogen, Microalgae and energy recovery and storages. Energy is the main input of the agricultural industry and technology.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba
Department of Mechanical and Industrial Engineering, University Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
