

## Special Issue

# Analysis and Prediction of Wind Turbine Noise

### Message from the Guest Editors

We are launching a Special Issue titled *Analysis and Prediction of Wind Turbine Noise*, to collect recent advances in this research area. We invite researchers to contribute high-quality original research or technical papers, reviews, and case studies to this Special Issue. Approaches to wind turbine noise control, the possibility of noise reduction, models for the prediction of wind turbine noise, the location and quantification of noise sources on a wind turbine, the interrelationships between noise annoyance and sound characteristics, and the influence of subjective variables such as attitude and noise sensitivity are welcomed but not limiting. We invite papers reporting investigations in both experimental and theoretical studies.

---

### Guest Editors

Prof. Tomasz Boczar

Dr. Daria Wotzka

Dr. Michał Koziol

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
