

Special Issue

Sustainable Public Transport

Message from the Guest Editors

This Special Issue of *Energies*, “Sustainable Public Transport,” will consist of manuscripts describing problems and challenges for modern public transport systems. The modern approach to city planning generates new expectations for mobility. Vehicle numbers are increasing, as is the number of journeys/trips being made. This results from changes in people's lifestyles, the habits created, and the increased convenience associated with personal transport. This development of individual transport contributes to the deterioration of road conditions (congestion), harms the environment due to air and noise pollution and energy consumption, and causes the deterioration of residents' health (due to increased use of personal transport). Both original research and review works are welcome for submission. Research topics of interest include but are not limited to models and methods of:

- public transport optimization
- public transport development
- sustainable mobility shaping and planning
- information technologies in a public transport system
- transit-oriented development strategies in urban area

Guest Editors

Dr. Marcin Kłos

Department of Transport Systems, Traffic Engineering and Logistics,
Faculty of Transport and Aviation Engineering, Silesian University of
Technology, Krasińskiego 8 Street, 40-019 Katowice, Poland

Dr. Renata Żochowska

Department of Transport Systems, Faculty Transport and Aviation
Engineering, Traffic Engineering and Logistic, Silesian University of
Technology, 40-019 Katowice, Poland

Deadline for manuscript submissions

closed (30 September 2022)

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
