

Special Issue

Biomass-Derived Fuels and Materials

Message from the Guest Editors

This Special Issue of *Energies* on “Biomass-Derived Fuels and Materials” aims to cover biomass-derived renewable fuels and materials conversion technologies, including biomass pretreatment and fractionation. We welcome submissions on microbial cultivation and thermochemical processes. We will consider submissions within the biorefinery concepts. We look forward to submissions on the biomass conversion to biofuels and biochemicals, including chemical, biochemical, thermochemical, microbial, and combined approaches. We expect submissions on technoeconomic and environmental analysis, supply chain assessment, byproducts, zero-waste techniques within the concept of circular economy, and process simulation/optimization. We welcome submissions on policy application and development related to the biobased economy. This Special Issue is addressed to researchers in crosscutting areas addressing any aspects of biomass-derived fuels and materials production.

Guest Editors

Prof. Dr. Dimitrios Sidiras

Laboratory of Simulation of Industrial Processes, Department of Industrial Management and Technology, School of Maritime and Industrial Studies, University of Piraeus, GR 18534 Piraeus, Greece

Dr. Leonidas Matsakas

Division of Chemical Engineering, Department of Civil, Environmental and Natural Resources, Luleå University of Technology, 971 87 Luleå, Sweden

Deadline for manuscript submissions

closed (31 July 2022)

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
