

## Special Issue

# Biomass and Waste as Feedstocks for Biofuel Production

### Message from the Guest Editors

In this [Special Issue](#), we are gathering valuable research and activities on the conversion of waste and biomass to biofuel and valuable products. This Special Issue will cover processes developed to reduce release of waste, and GHG emissions to the environment. Based on your expertise in this field, we think you could make an excellent contribution. We kindly invite you to contribute a paper in this Special Issue on “Biomass and Waste as Feedstocks for Biofuel Production” at *Energies*, an MDPI journal with an IF of 3.004. If you are not able to submit by 31 May 2022, please do not hesitate to let me know. For further details on the submission process, please see the instructions for authors at the journal website (<https://www.mdpi.com/journal/energies/instructions>). We hope you find this topic of interest and look forward to potentially collaborating with you. Please feel free to contact me with any questions.

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
