

Special Issue

Biomass Chars: Elaboration, Characterization and Applications

Message from the Guest Editors

This Special Issue provides an overview for biomass chars production methods (pyrolysis, hydrothermal carbonization, *etc.*), the characterization techniques (Scanning Electronic Microscopy, X-Ray Fluorescence, Nitrogen adsorption, Raman Spectroscopy, Nuclear Magnetic Resonance Spectroscopy, X-ray photoelectron spectroscopy, Temperature Programmed Desorption and Mass Spectrometry, *etc.*), their properties and their suitable recovery processes. This Special Issue would like to encourage original contributions regarding recent developments and ideas in Biomass Chars: Elaboration, Characterization and Applications.

Guest Editors

Prof. Dr. Mejdi Jeguirim

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
