

Special Issue

Heat Transfer in the Components of Power Boilers and Related Technological and Endurance Problems

Message from the Guest Editors

We invite you to submit your original research or overview papers to this Special Issue on the “Heat transfer in the Components of Power Boilers and Related Technological and Endurance Problems” in *Energies*. Renewable energy becomes a decisive factor in power energy, as their activity alters the stable operation of conventional power units to unsteady, with fast start-ups and shut-downs. Newly built power units (coal- or gas-fired, nuclear) have higher efficiency, that results from raised parameters of steam. As a result, new materials with appropriate mechanical and physical properties are employed in order to withstand the challenging parameters of operation. In nuclear energy, additional ionizing radiation makes the operation of parameters more demanding. The material evolution requires new technology of manufacturing, ensuring appropriate heat transfer and the enhancement of materials durability. The presentation of research results and studies focusing on this problem will be the subject of this Special Issue of *Energies*.

Guest Editors

Prof. Dr. Jerzy Okrajni

Faculty of Materials Engineering, Silesian University of Technology, 44-200 Gliwice, Poland

Dr. Krzysztof Wacławiak

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
