

## Special Issue

# Building Integrated PV System

### Message from the Guest Editors

The planning, design, and implementation of BIPV systems tend to be a more complex process than is the case for conventional PV systems as there are many important factors to consider. With BIPVs, there needs to be a balance between the power produced, the cost of the system, and the aesthetics—the focus should neither be only on electricity nor aesthetics. There needs to be improved building quality and energy performance in addition to addressing the aesthetics without forgetting safety and building regulations. As such, research studies about BIPVs involves different areas: building process, building physics, energetic design, aesthetical concept, economical concept, and building regulations. This Special Issue aims to bring together the latest advances, experiences, findings, policies, and developments related to BIPVs.

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

### Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University  
Niccolò Cusano, 00166 Roma, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
