

## Special Issue

# Resilience and Climate Adaptability of Buildings and Urban Areas

### Message from the Guest Editors

Larger, denser cities are viewed as being more energy and resource efficient but have the effect of intensifying the microclimatic effects responsible for the urban heat island effect. This Special Issue will collect the latest research on how we can design buildings and urban areas to decrease the risks of climatic change and ameliorate the urban heat island effect making urban areas more comfortable and safer for human habitation both in and out of doors. Through this holistic approach, we can create truly resilient urban areas. Topics include but are not limited to the following:

- Urban climate
- Urban heat island
- Outdoor thermal comfort
- Climate change resilience
- Adaptation
- Master planning
- Human health and wellbeing

---

### Guest Editors

Dr. Tristan Kershaw

Centre for Energy and the Design of Environments (EDeN), Department of Architecture & Civil Engineering, University of Bath, Bath, UK

Prof. Dr. David Coley

Department of Architecture and Civil Engineering, University of Bath, Bath BA2 7AY, UK

---

### Deadline for manuscript submissions

closed (30 October 2021)

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

---

### Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University  
Niccolò Cusano, 00166 Roma, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
