

## Special Issue

# What's Next for Building Energy Efficiency?

### Message from the Guest Editors

Energy use for maintaining comfortable indoor environments in buildings is globally the single largest contributor to greenhouse gas (GHG) emissions. Continuous research and development in increased building energy efficiency during the operation phase is therefore a vital component in realisation of decarbonisation of the building sector to a sustainable level. In this special issue, we wish to collect and display original contributions reporting on recent advances in theoretical and experimental research that reduces the GHG emissions during operation of existing and new buildings without increasing life-cycle GHG emissions or negatively impact the indoor environmental quality. We invite contributions describing any kind of novel solutions for reduction of the energy demand side whether it is solutions for permanent reduction of building energy and/or solutions that enables the operation of buildings to provide temporal demand response.

### Guest Editors

Dr. Christian Anker Hviid

DTU Civil Engineering, Department of Civil Engineering, Technical University of Denmark, Brovej, Building 118, room 214, 2800 Kgs. Lyngby, Denmark

Prof. Dr. Steffen Petersen

Department of Engineering, Aarhus University, 8000 Aarhus C, Denmark

### Deadline for manuscript submissions

closed (1 June 2022)

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

### Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University  
Niccolò Cusano, 00166 Roma, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
