

Special Issue

Challenges and Opportunities in Oil, Gas, and Electricity Sectors during and after the Pandemic

Message from the Guest Editor

The year 2020 was a dramatic year for the energy sector. Energy supply and demand fell unprecedentedly as coronavirus containment measures, including shutdown of industrial sites, lockdowns, curfews, border and travel restrictions, were applied. The outbreak of the pandemic destabilized market dynamics and led to historically low energy prices, which were previously unseen. Once the world comes back to life after the pandemic, demand for energy will surge, but volatility is expected as it is unclear when all sectors will get back to their pre-virus levels. This Special Issue is devoted to understanding the impacts of COVID-19 on energy markets and the environment and assessing challenges and opportunities during and after the pandemic. Manuscripts should present models which address these issues. Contributions discussing policy and regulation issues are also welcome. Submissions should be original and relevant to the Special Issue's topics.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
