

Special Issue

CO₂ Enhanced Oil Recovery and Carbon Sequestration

Message from the Guest Editors

Further research and development are drastically needed to address the many technical challenges associated with CO₂ EOR and carbon sequestration. In this Special Issue, we invite experts to submit articles which report on the recent technological developments in the following areas of CO₂ EOR and carbon sequestration: laboratory studies and experimental measurements, theoretical studies and numerical simulations, phase behavior and PVT studies, miscibility mechanisms, modified CO₂ injection techniques, wellbore technologies, multiphase flow in reservoir, evaluation of storage capacity, leakage detection and measurement technologies during CO₂ storage, geochemical reactions during CO₂ injection and storage, geomechanical aspects of CO₂ injection and storage, coupled thermal/hydrological/mechanical simulation of CO₂ injection, CO₂-based hydraulic fracturing techniques, effect of impurities on the process efficiency, robust optimization of CO₂ EOR and sequestration, economic analysis, life-cycle analysis, etc. Both original research articles and review articles will be welcome.

Guest Editors

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
