

Special Issue

Control and Communication in Distributed Generation Systems

Message from the Guest Editor

We are inviting submissions to the *Energies* Special Issue on “Control and Communication in Distributed Generation Systems”. This Special Issue aims at addressing the challenges in control design and implementation, energy management strategies, communication architectures and protocols, and topologies for power electronics-based distributed generation systems. Original submissions focusing on practical issues related to this particular case of networked control systems, including circuit topologies, design techniques and methodologies, and practical implementation aspects are welcome. The issue will include, but is not be limited to:

- Local control schemes and algorithms for distributed generation systems
- Centralized and decentralized energy management strategies
- Communication architectures, protocols and properties of practical applications
- Topologies of distributed generation systems improving flexibility, efficiency and power quality
- Practical issues in control design and implementation of distributed generation systems

Guest Editor

Dr. Miguel Castilla

Department of Electronic Engineering, Universitat Politècnica de Catalunya (UPC), 08800 Vilanova i la Geltrú, Spain

Deadline for manuscript submissions

closed (18 January 2018)

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

*Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy*

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
