

## Special Issue

# Cyber Security in Modern Power Systems

### Message from the Guest Editors

This [Special Issue](#) aims to provide new concepts, methods, strategies, technologies and implementation experiences in modern power system cyber security, including active distribution networks (ADNs), microgrids, smart grids, and bulk power systems. Published works will establish clear procedures to address cyberattack detection, mitigation, and correction, as well as cyber security in power systems planning, operation and control. This includes state estimation, event detection, forecasting, control, and protection, among other preventive, corrective and restorative strategies necessary to ensure a safe, reliable, economical, and sustainable energy supply.

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

---

### Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University  
Niccolò Cusano, 00166 Roma, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
