

Special Issue

Development Trend Analysis of Power Distribution Systems

Message from the Guest Editors

This [Special Issue](#) aims to draw attention to research and review articles regarding the developmental trend analysis of power distribution systems, focusing on promoting theoretical and practical studies in the control and operation of power distribution systems and providing a convincing analysis of distribution system developments. The topics of interest include, but are not limited to, the following: 1) Low-voltage direct current supply and utilization system and MVDC application in power distribution systems; 2) The power quality analysis and model for power distribution systems; 3) Power electronic device applications in power distribution systems; 4) Active distribution systems and distributed energy resources; 5) Demand-side response in power distribution systems; 6) Renewable energies and energy storage coordination operation in power distribution systems; 7) Electric market optimization and models in power distribution systems; 8) The application of AI, machine learning, etc., in power distribution systems; 9) Prospect and analysis of power distribution system developments.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba
Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
