

Special Issue

Urban/District Thermal Energy System

Message from the Guest Editor

The is inviting submissions to a Special Issue of *Energies* on the subject area of “Thermal Energy Storage and Carbon Capture”. In today’s world, environmental problems and the energy crisis are two major global issues that need to be urgently addressed. The continuous rise in the level of energy consumption and the emission of greenhouse gases are the main forces driving the need for more effective use of renewable energy sources. The thermal energy storage system is one of the alternative solutions to address this matter. This Special Issue will deal with novel technologies and techniques for developing thermal energy storage systems in different applications.

Guest Editor

Dr. Mahyar Silakhori

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
