

Special Issue

Economic and Policy Challenges of the Energy Transition in CEE Countries

Message from the Guest Editor

The transformation of national energy systems towards sustainability is progressing throughout all Central and Eastern European (CEE) countries, yet the goals and results are different. Most Member States have made substantial progress towards meeting their long-term commitments of emissions reductions. However, some block members have struggled to meet their obligations. In this context, this Special Issue aims to bring into the discussion the challenges that CEE countries have to face and overcome while undergoing energy transition. Contributions on the following topics, among others, are invited:

- Energy transition;
- Economics of energy systems;
- Climate and energy policy instruments;
- Power generation system transition;
- Intelligent power and district heating networks;
- Demand-side management and energy storage;
- Integration of energy markets;
- Energy efficiency;
- Renewable energy;
- Low- and zero-emission transport;
- Smart grids

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
