

# Special Issue

## Economics of Bioenergy 2019

### Message from the Guest Editor

The transition to a bioeconomy, and thus to a higher dependence on biomass for a range of uses, faces several challenges. This Special Issue focuses on the use of biomass (from various sources) for producing bioenergy and the economic challenges of such usage. The scope of this Special Issue encompasses empirical and theoretical contributions that focus on bioenergy and, e.g., supply and demand issues, policy implementation and design, innovation, market creation, competition, and trade. Other areas of study may also be considered, but they must have a clear bearing towards identified economic challenges and be based on economic theory.

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

### Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University  
Niccolò Cusano, 00166 Roma, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
