

Special Issue

Economics of Energy and Environmental Policy in Electricity Market

Message from the Guest Editor

Global environment awareness requires us to consider more carefully what drives the economics of energy production and energy use. We must consider how environmental policy plays a role in development. How does economic policy play a role in this? Is it changing? What drives the current electricity market and forces associated with energy use? What is the role of renewable energy and sustainability, considering climate change and global warming? Further, how is environmental policy evolving, and how has it been applied in this respect? When considering the “Economics of Energy and Environmental Policy in the Electricity Market”, we are particularly interested in foreign direct investment, infrastructure, and renewable energy. The role of renewable energy and sustainability is also of particular interest, especially when considering climate change and global warming. Other related issues are also of interest.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
