

Special Issue

Sustainability Assessment, Analysis and Planning of Renewable-Based Electrification Projects

Message from the Guest Editors

This Special Issue aims to gather and compile experiences on sustainability assessment, analysis, and planning of renewable-based electrification projects worldwide in order to overcome the existing barriers. Topics of interest for publication include but are not limited to the following:

- Local-scale renewable-based electrification projects;
- Regional-scale renewable-based electrification programs;
- Sustainability assessment of electricity access experiences;
- Use of multicriteria tools for decision analysis;
- Use of optimization techniques as a design support;
- Social impacts assessment;
- Management models.

Guest Editors

Prof. Dr. Laia Ferrer-Martí

Dr. Bruno Domenech

Prof. Dr. Alberto García-Villoria

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
