

Special Issue

Energy Conservation and Management in Infrastructures 2018

Message from the Guest Editor

This Special Issue invites researchers from academia and industries to submit novel ideas, best practices, and case studies on energy conservation and management in infrastructures, such as commercial and residential buildings, towers, houses, and government and public facilities, as well as transportation and roads. Short and regular papers are expected to discuss challenges in energy conservation measures, energy efficiency, analysis, control, economic analysis, renewable energy technology assessment and management, optimization methods, the use of energy supply, storage, renewable, distributed energy storage systems, and conversion technologies that covers thermal, gas, electricity, water, and transportation systems, as integrated within infrastructures of urban, cities, and small communities. (Gaber)

Guest Editor

Prof. Dr. Hossam A. Gabbar

Faculty of Energy Systems and Nuclear Science, Ontario Tech University, Oshawa, ON L1H 7K4, Canada

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
