

Special Issue

Energy and Resource Management under Carbon Neutrality

Message from the Guest Editors

We invite you to submit your original papers to this Special Issue on “Energy and Resource Management under Carbon Neutrality” and look forward to receiving your outstanding research. The purpose of this Special Issue is to unite the efforts of researchers from all over the world to carry out adequate and sensible resolutions on promoting energy transition towards carbon neutrality from the perspective of energy and resource management. The research topic in this Special Issue will focus on energy and resource management policy under the carbon neutrality target. Suitable energy policies and resource management regulations will be encouraged. Articles selected for this Special Issue will be subject to a peer-review procedure with the aim of rapid and wide dissemination of fundamental and practical research results. **Keywords:**

- Energy system transition
- Carbon neutrality
- Energy policy
- Resource management
- Clean energy
- Climate change

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
